

EasyToGrowSeeds

EasyToGrowSeeds

Rocket (wild)

£2.10

Rocket seeds (wild): Wild rocket has a stronger flavour than the cultivated variety (some say a better flavour), with a smaller leaf area; these seeds are excellent value as there are 6000 seeds in a packet! Cut and it grows again and again (2-3 times). Sow Mar-May and also Aug-Sep.

Rocket is believed to have been first introduced into the UK by the Romans. Rocket has a peppery taste and goes well in salads and pizza's. Rocket is an annual plant and is also known as "arugula". In Solvenia it is added to the cheese Burek, as is sometimes added to pesto.
